JCB POWER PRODUCTS | QS GENERATOR RANGE

Power: 50Hz, 20 - 220kVA / 60Hz, 18 - 165kW
THE G20QS TO G220QS ARE A COMPREHENSIVE GENERATOR RANGE. AS WITH ALL OF OUR MODELS, THESE MACHINES ARE DESIGNED FOR ULTIMATE PRODUCTIVITY AND EFFICIENCY EVEN IN THE HARSHEST ENVIRONMENTS.

Efficient performance.

JCB engines provide power for the generator range - that means you can expect superior performance, low fuel consumption, increased efficiency and low noise. It also means you can expect the sort of reliability that’s only possible from a unit that’s tried and proven in 200,000 machines around the world. Plus, the alternators are among the most efficient on the market, and all of these generators are fitted with them as standard.

Monitoring and programming is easy with the standard Deep Sea Electronics (DSE) 4510 control panel. A large screen and multilingual settings make it a very simple-to-use unit.

Made to last.

The three-stage fuel filter and optional self cleaning air filter protect the engine from premature wear even in the harshest environments. The whole range has been developed and tested to operate in temperatures over 50 degrees so it’s no stranger to extreme environments.

To provide ultimate strength and durability in the most extreme conditions, serious filters and a robust, high quality steel canopy incorporating a single piece roof and its all protected by a phosphate dip and seven-stage paint process, giving a highly durable finish.

Easy servicing.

Large heavy-duty service doors provide excellent access to key areas of the generator and robust removable hinges mean you can simply lift the doors off for even easier maintenance entry.

Quick and easy maintenance checks can be made as all of the key service points can be located from one side of the machine.

Innovative flourishes.

The optional DSE 4520 control panel includes a transfer switch for smooth change-over between main and generator power in the event of mains failure.

When it comes to noise, these generators create low noise levels, as low as 62dBA, ideal for a range of applications.

The G20QS to G220QS compact generators are easy to transport and position with a range of optional lift points. There’s a choice of four lifting lugs, large fork pockets or a central lift point to enable the generator to be easily moved and placed on site.

In the event of mains failure, the generator will automatically start and supply power to your site.

Innovative and feature-packed.

Large heavy-duty service doors provide easy service access. Large fork pockets or a central lift point to enable the generator to be easily moved and placed on site.

The options include a transfer switch for smooth change-over between mains and generator power in the event of mains failure.

When it comes to noise, these generators create low noise levels, as low as 62dBA, ideal for a range of applications.

The G20QS to G220QS compact generators are easy to transport and position with a range of optional lift points. There’s a choice of four lifting lugs, large fork pockets or a central lift point to enable the generator to be easily moved and placed on site.
JCB LIVELINK FOR POWER.

VALUE ADDED.

The global network of JCB Parts Centres is another model of efficiency; with 16 regional bases, we can deliver around 95% of all parts anywhere in the world within 24 hours. Our genuine JCB parts are designed to work in perfect harmony with your machine for optimum performance and productivity.

JCB’S WORLDWIDE CUSTOMER SUPPORT IS FIRST CLASS. WHATEVER YOU NEED AND WHEREVER YOU ARE, WE’LL BE AVAILABLE QUICKLY AND EFFICIENTLY TO HELP MAKE SURE YOUR MACHINERY IS PERFORMING TO ITS FULL POTENTIAL.

**JCB Assetcare** may not be available in your region, so please check with your local dealer.

**JCB LIVELINK** puts the power in your hands. Revolutionise the way you monitor and manage your power generators to maximise productivity, decrease running costs and increase efficiency.

Data and insight – Keep the productivity high to keep the power on with JCB Livelink. Real-time information keeps you in complete control to let you monitor and manage your power generators remotely via a PC or Smartphone.

Monitor and manage – The latest tools and software allow you to monitor your generators at any time, from anywhere, and configure your preferences to exactly suit your needs. Whether you’re looking to generate options, the better value for money and generate returns.

Optimised Fleet Management – JCB Livelink is designed to provide a powerful reporting tool to deliver higher machine availability, improved fleet control and enhanced machine value, accessed via an online portal.

Monitor and manage your fleet on the go with JCB Livelink.

JCB Livelink provides instant access to factory expertise, day or night, while our Finance and Insurance teams are always on hand to provide fast, flexible, competitive quotes.

JCB Assetcare offers comprehensive extended warranties and service agreements, as well as service-only or repair and maintenance contracts. Irrespective of what you opt for, our maintenance teams around the world charge competitive labour rates, and offer non-obligation quotations as well as fast, efficient insurance repair work.
