Not classified as hazardous

Combustion products may include oxides of carbon, nitrogen and sulfur as well as unidentified organic and inorganic compounds.

Fire fighters to wear self-contained breathing apparatus if risk of exposure to vapour or products of combustion.

No special hazards arising from the use of the product.

6. Accidental release measures

Spills & Disposal
- Contain - prevent contamination of drains and waterways.
- Use absorbent (soil or sand, sawdust, inert material, vermiculite).
- Collect and seal in properly labelled drums for disposal.
- Dispose of waste as per Local, State and Federal Land Waste Management Authorities.

Personal Precautions
- Use suitable protective equipment (Section 8). Avoid contact with spilled material.

Environmental Precautions
- Do not discharge into the drains/surface waters/groundwater. Do not discharge into the subsoil/soil.

7. Handling and storage

Precautions for Safe Handling
- Put on appropriate personal protective equipment (see Section 8). Workers should wash hands and face before eating, drinking and smoking. Take precautionary measures against static discharges. Keep containers tightly closed when not in use. Empty containers retain product residue. Do not reuse container.

Conditions for safe storage, including any incompatibilities
- Store in a cool, dry, well-ventilated area away from sources of ignition, strong oxidizing agents and foodstuffs.

8. Exposure controls/personal protection

Exposure Controls, Personal Protection

Occupational exposure limit values
- No value assigned for this specific material by the National Occupational Health and Safety Commission (Safe Work Australia).

Biological Limit Values
- No biological limits allocated.

Appropriate engineering controls
- Maintain concentration below recommended exposure limit. Good general ventilation should be sufficient to control worker exposure to airborne contaminants. If this product contains ingredients with exposure limits, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure below any recommended or statutory limits.

Respiratory Protection
- If engineering controls are not effective in controlling airborne exposure then respiratory protective equipment should be used suitable for protecting against airborne contaminants. Final choice of appropriate breathing protection is dependent upon actual airborne concentrations and the type of breathing protection required will vary according to individual circumstances. Reference should be made to Australian/New Zealand Standards AS/NZS 1715/1716.

Eye Protection
- Safety glasses, goggles or faceshield as appropriate.

Hand Protection
- PVC, neoprene or nitrile rubber gloves.

Body Protection
- Overalls or similar protective apparel. Enclosed footwear.
