<td>8. EXPOSURE CONTROLS/PERSONAL PROTECTION</td>
<td>National Exposure Standards: No value assigned for this specific material by the National Occupational Health and Safety Commission (Safe Work Australia). National Exposure Standards: Oil mist - TWA 5mg/m³, STEL 10mg/m³. Engineering Controls: Maintain concentration below recommended exposure limit. Good general ventilation should be sufficient to control worker exposure to airborne contaminants. If this product contains ingredients with exposure limits, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure below any recommended or statutory limits. Respiratory Protection: If engineering controls are not effective in controlling airborne exposure then respiratory protective equipment should be used suitable for protecting against airborne contaminants. Final choice of appropriate breathing protection is dependent upon actual airborne concentrations and the type of breathing protection required will vary according to individual circumstances. Reference should be made to Australian/New Zealand Standards AS/NZS 1715/1716. Eye Protection: Safety glasses, goggles or faceshield as appropriate. Hand Protection: Impervious gloves, e.g. PVC or nitrile rubber gloves. Footwear: Enclosed footwear. Body Protection: Overalls or similar protective apparel.</td>
